

Xm has been nothing but the best way for me to get my traffic and weather.... I've never gotten great reception in my car or my house, but with MY XM I can hear it all loud and clear. I never lose my signal, and when I travel, It gets me where I'm going so much easier, I dont always have time in the morning before work to surf TV and hopefully find traffic, let alone weather for my area. With my XM Its always where I leave it, and its updated every few minutes,whereas on TV, I've got to wait until the news comes on or an accident to be important enough for "breaking news". I've simply got no time for that. So leave XM to provide those of us on the go with what we need.
